

# Pressure - pushing down on me

Were you correct in guessing which hole the water would pour out the furthest?

Does each stream of water look the same?

Why not?

How much air is pressing down on us at all times?

Why don't we feel it?

What was the example I gave as to why we don't feel it?

Is there more air pressure or less air pressure at the top of the atmosphere?

Is there more air pressure or less air pressure at the bottom of the atmosphere?
