

What Shapes Our Land?

Look at the pictures of different landscapes. Make some observations and write them down!

Draw a picture of the landscape you created! Make sure to label the different parts of your landscape.

A large, hand-drawn rectangular frame with a wavy, textured border, intended for a student to draw a landscape within it.

As you shape your landscape, fill in the table below with your observations.

Cause of Weathering	What I Noticed:
River	
Wind	
Rain	
Glacier	

Redraw your landscape now that it has been shaped by weathering and erosion! Label where weathering, erosion, and deposition made a difference.
